

# Learning C++ Effectively By Practicing

Simpliv LLC

## Course Specifications

**Mode of Study :** Offline study mode

**Location :** Nairobi

**Duration :** 410 days 58 weeks 13 months 1 year

**Intake :** April

## Course Summary

### Description

In this course, you will be getting practice questions on each and every topic of C++ starting from scratch and covering each topic precisely taking to end topics. In this course, you will be learning about topics like C++ history, the basic syntax of a C++ program, keywords, data types, classes and objects, constructor, destructor, encapsulation, polymorphism, data abstraction, inheritance, exception handling, and many more such topics. This course is designed in a very comfortable way of learning C++ that is by just practicing more and more on each and every topic.

Who this course is for:

Anybody who loves coding and want to get started with C++ or has good knowledge in C++

### Basic Requirements

No prerequisites required for this course

### What will you learn

You will be learning about topics like

- C++ history, basic
- syntax of a C++ program
- keywords
- datatypes
- classes and objects
- constructor and destructor
- encapsulation
- polymorphism
- data abstraction
- inheritance
- exception handling and many more
