

Course Specifications

Mode of Study : Blended

Location : Nairobi

Duration : 3 Year(s)

Intake : January, February

Course Summary

Majoring in Geography provides a grounding in: Environmental change - from land degradation to environmental management. Environmental policy - including global and national environmental agendas, shortfalls, and policy implementation. Earth systems - from climate studies and meteorology, to earth surface processes, to earth's biodiversity and ecosystems. Human society - looking at economic development, climate and society, cultural geography and urban dynamics. Geographical Information Systems and Remote Sensing - foundation courses in GIS and Remote Sensing are carried out in our GIS labs during the second and third years of study.
